Re: Village of Goshen – Willingness to Serve Wastewater to Maplewood Village

Dear Mr. Stach:

The Village's wastewater engineer, Jim Farr, P.E., Farr Engineering, has advised me that at this time the Village's wastewater treatment plant can accommodate the projected wastewater flow of 29,760 gallons per day from your client's proposed subdivision in the Town of Goshen, identified as the Maplewood Village subdivision.

The Village is willing to provide the project with wastewater treatment. The owner or Town Sewer District, if created, will be required to enter into agreement with the Village subsequent to preliminary approval of the subdivision. All applicable out of Village fees and conditions will apply.

Should you have any questions, please contact me.

Sincerely,

Mayor Kyle Roddey

Cc: Village Clerk Meg Strobl
Village Attorney David Donovan
DPW Superintendent Scott Birney
